

Interlake–Eastern
Regional Health Authority

Dear Parent/Guardian,

As you register your child for kindergarten, your regional public health team has included a health checklist of items to review.

A school entry booster of diphtheria, tetanus, polio, and pertussis vaccine (the 4-in-1 vaccine) as well as the combined dose of mumps, measles, rubella and varicella vaccine (MMRV vaccine) is recommended. These 2 needles can be given at one office visit.

Your child's immunizations can be done by your local public health nurse or your health care provider.

Enclosed is the health checklist and a package of health-related education material for you and your family.

If you wish to book an appointment for your child's school entry boosters, or if you have any questions or concerns, please call the Selkirk Public Health Office, at **204-785-4891**.

Sincerely,

Interlake-Eastern Public Health Team
